Elite Workout Manual

Chapter 3 – Lower Day (Strength Focus)

Objective

Build lower-body strength, improve squat mechanics, enhance athletic power, and develop posterior-chain strength while respecting your current balance and deadlift technique limitations.

Order	Exercise	Sets	Reps	RPE	Rest	Tempo
1	Box Squat / Goblet Squat (Technique)	4	5–6	7–8	2–3 min	3-1-X-1
2	Romanian Deadlift	4	6–8	8	2–3 min	3-1-1-0
3	Leg Press	3	8–10	8	90 s	2-1-1-0
4	Seated Leg Curl	3	10–12	8	75 s	2-1-2-0
5	Standing Calf Raise	4	10–15	8	60 s	2-1-2-1
6A	Cable Woodchopper	3	10/side	8	—	Controlled
6B	Pallof Press	3	12/side	8	60 s	Controlled

Athletic Component

After lifting, perform 3 rounds of 3 broad jumps with full recovery to build explosive power for cricket and pickleball.

Technique Priority

Your squat limitation appears to be balance rather than pain. We will first master movement quality before chasing heavy loads. Romanian deadlifts are used to teach the hip hinge before conventional deadlifts.

Common Mistakes

Allowing knees to collapse inward, rushing Romanian deadlifts, lifting heels during squats, and sacrificing technique to lift heavier.

Progression

Increase weight only after all prescribed sets are completed with solid technique and 1–2 reps left in reserve.
