Elite Workout Program - Part 1: Foundation

Athlete Profile

Primary Goal: Body Recomposition.
Secondary: Strength, athletic performance, posture, first pull-up, lean athletic physique, improved cricket and pickleball performance.

Why Upper-Lower-Push-Pull-Legs?

Chosen because it balances strength, hypertrophy, recovery, posture work, and athletic development over 5 training days.

Weekly Schedule

Monday: Upper
Tuesday: Lower
Wednesday: Recovery & Mobility
Thursday: Push
Friday: Pull
Saturday: Legs
Sunday: Recovery

Daily Timeline

5:40 AM Wake
5:50 AM Gym
Warm-up
Workout
7:00 AM Finish & Breakfast

Universal Warm-up (5–8 min)

1. 2 min brisk walk/march or jumping jacks.
2. Dynamic mobility: arm circles, hip circles, leg swings, thoracic rotations, World's Greatest Stretch (10 reps each).
3. Activation: band pull-aparts x15, scapular push-ups x10, bodyweight squats x10, glute bridges x10, ankle rocks x10.
4. Progressive warm-up sets before each main lift.

Cooldown

5 minutes easy walking, breathing, then 20–30 second stretches for trained muscles.

Mobility Routine (Wed/Sun or post-workout)

Open books 2x10
Couch stretch 2x30s
Dynamic hamstrings 2x10
Ankle rocks 2x15
Doorway chest stretch 2x30s
Lat stretch 2x30s
Neck rotations 1 min
Deep squat hold 30s progressing to 2 min.

Daily Posture Routine

Chin tucks 2x10
Wall slides 2x10
Band pull-aparts 2x15
Dead bug 2x10/side
Cat-cow 1x10

Pull-up Progression

Weeks 1–4: Scapular pull-ups, dead hangs, lat pulldowns, assisted pull-ups, negatives.
Weeks 5–8: Band-assisted pull-ups, longer negatives, top holds.
Weeks 9–12: Weekly strict pull-up attempts followed by assisted volume.

Athletic Development

Develop rotational power, acceleration, deceleration, grip, shoulder resilience, core stability, and single-leg balance using medicine ball work (if available), carries, anti-rotation core work, and controlled jumps.

Recovery Rules

Sleep: 8–9 h
Protein goal: 110–140 g/day
Hydration: 3–3.5 L/day
Steps: 8,000–10,000+ daily
Aim for 80–90% nutritious foods.

Success Metrics

Track every 4 weeks: body weight, waist, progress photos, pull-up progress, strength, energy, sleep, and workout adherence.
